

Shure E4 Stereo Earphones

Item Info Shure E4 Stereo Earphones

Shure E4 Stereo Earphones

Shure E4 Earphones feature a cutting-edge industrial design and are a breakthrough in sound isolating earphone technology.

Ideal for the business traveler and on-the-go audiophile, the High-Definition Driver with Tuned Port Technology delivers brilliant highs and extended bass that enhance your listening experience with your portable MP3, DVD, and CD players as well as all other audio sources.

Sound Isolating Technology

The E4's in-ear design works like an earplug to block background noise naturally. This enables you to listen comfortably at lower volumes—even in loud environments. And unlike bulky headphones utilizing active noise cancellation technology, no artifacts are introduced into your listening experience. Sound isolating earphones are also much smaller and don't require batteries.

The clarity and award-winning performance of Shure Personal Audio products immerse you in the moment. Experience the incredible performance. Embrace your sound. Whenever. **Wherever. Now. Shure Personal Audio.**

Shure Sound Isolating Earphones: E Series

- **E2c: Dynamic MicroDriver Technology**
Lightweight, sound isolating earphones with rich, full-frequency soundstage
- **E3c: Wideband MicroDriver Technology**
Lightweight, sound isolating earphones with extended frequency soundstage
- **E4c: High-Definition Driver with Tuned Port Technology**
Ultra-wide frequency soundstage with brilliant highs and extended bass
- **E5c: Dual Live Performance Drivers with Inline Crossover**
Extended frequency response for precise highs, natural mids, and full bodied bass

Shure E4c Speaker Type: High-Definition Drivers with Tuned Port Technology

E4 Sound Isolating Earphones feature High-Definition drivers with Tuned Port Technology for incredible audio reproduction. As the ideal companion to any

portable or home audio source, the E4's Tuned Port design improves airflow around the driver to deliver professional-grade sound with extended bass response. (See technical specs)

Personal Fit Kit

Because every ear is different, E4 Earphones come with a pair of disposable Foam Sleeves, a pair of Triple Flange Sleeves, three pairs (small, medium, large) of Flex Sleeves, and three pairs of Soft Flex Sleeves (small, medium, large) to ensure the ideal personalized fit.

Secure In Ear Design

The soft, flexible sleeves in the Fit Kit gently contour to the inside of your ear to create a comfortable, secure fit, so that the earphones don't fall out while you're exercising. The E4's are also compatible with custom-molded sleeves, made by a hearing specialist, for the ultimate in fit and comfort.

Lightweight Construction

Weighing only 1.1oz (31 g), the E4 is lightweight and secure enough for any portable listening application.
